- ✓ Piping on pocket mouth front and back (Please note it is not possible to add Piping onto Curved pockets)
- ✓ Change buttons
- ✓ Side seam tape
- ✓ Add Tax Tabs

# Behind the seams

All garments are a combination of technical excellence and fine craftsmanship expertise that sets them apart from high street suits

A corporatewear jacket is engineered to be far more hardwearing, built specifically for the demands of everyday use in a professional environment. Its internal structure is more robust, with carefully considered details that enhance durability, ensuring the jacket maintains its shape, performance, and appearance through frequent wear and regular washing.

The Collar
If you open up the collar you will notice an extra tape that is used to help stiffen the collar.

The Buttons
Dyed through buttons that look good for years without fade.

The Lapel
The lapels are carefully crafted and rolled to give shape and depth for a clean crisp sharp suit.

The Canvas
The canvas creates a structured look but it is also durable and flexible allowing the jacket to naturally conform to your body shape.

The Pockets
The pockets are precision made to look good and stay in shape for the life of the garment.

# Tax Tabbing your tailoring

Our tax tab service offers a subtle yet highly effective way to incorporate branding into tailored garments without compromising their professional appearance.

These small, high-quality woven labels can be fully customised to reflect your brand identity, creating a consistent and polished look across your uniform.

Tax tabbing is an ideal solution for businesses looking to enhance brand visibility in a refined and understated way. Unlike external branding, these labels are discreetly placed, ensuring the garment maintains a clean, corporate aesthetic while still reinforcing brand recognition. This makes them particularly well-suited to environments where a more sophisticated or formal appearance is essential.

In addition to branding, tax tabs also support garment identification and organisation, which can be especially useful in larger teams or multi-site operations. They can help streamline uniform management, making it easier to track, distribute, and maintain garments efficiently.

Each label is carefully sewn into considered locations to maximise visibility when needed, while remaining unobtrusive during wear. Common placement options include:

— The side seam, cuff, or pocket of a shirt
— The waistband of trousers or skirts
— The pocket flap of a jacket.

With a range of placement options available, we can help you create a polished and professional look that aligns with your brand image.

Simply let us know where they'd like the tax tab placed, and we'll take care of the rest.

# People & Planet

We don’t just claim sustainability, we certify it. We proudly partner with Carbon Neutral Britain, Wrap, Sedex and Oeko Step to ensure our products, and our processes, support both people and planet.

We believe that we should be held accountable for our environmental impact. So until we reach our goal of zero, we’re taxing ourselves for the carbon we do emit, and investing in carbon offsets to fund projects that neutralize our footprint.

This goes towards funding projects not just on emissions, but also their wider impact – providing secondary benefits such as education, employment, clean water, and a positive impact on the local wildlife and ecology.

## Turning recycled plastic into tailoring

The Recycled Polyester fibre is made from 100% PET Plastic Bottles and is Certified by the Global Recycled Standard and is produced in a Green Mill powered by Bio Fuel.

The bottles are sourced using various socially compliant sources such as Identified Collection Agencies, Reverse Vending Machines and collection drives at events. The bottles are cleaned, washed and crushed to create plastic flakes. The flakes are melted down and extruded to make fibre.

We don’t use agencies to manufacture our tailoring. We don’t use factories that we haven’t meticulously checked. We know who makes our clothing and we also expect the same from the partners we work with from the fabric mills to the button suppliers. Our supply chain is industry leading in terms of compliance, sustainability and welfare so you can feel assured that we only work to the highest practices.
